

How to Join Connect NSV

Reach Out

Contact us at jjablon@gmu.edu or www.unitedwaynsv.org/VAN

Community Strategy Session

Before joining the network it's important to get to know the platform. Attend a Strategy Session with fellow community members to learn how it will fit into your team's work. Community Strategy Sessions leverage community expertise to grow and develop the network.

Workflow Planning Meeting

These meetings ensure you are set up for success once you are on-boarded to the network. Participate in one-on-one phone calls or in-person sessions to talk through current referral workflows.

Submit Your Partner Registration Form

The Partner Registration Form will be sent to your organization to provide Unite Us with details about programs that will receive referrals and their eligibility requirements, and to identify staff who will be using the software.

Software Training

Invitations will be sent out to participate in an in-person, virtual, or self-paced software training. Our team will guide you through registration and training.

Go Live

Once you have been trained and on-boarded, you can log in, use the network to coordinate care in your community, and begin tracking outcomes. Ongoing software training webinars and live support will be provided by Unite Us. You're now part of Connect NSV!
